0

The Lake Cushman Firewise Council has initiated a program to install address markers to support our local Fire Department.

The purpose of the address marker is to aid the Fire Department in finding your property in the case of an emergency. As you know in an emergency situation every second wasted is another second that could have saved you or one of your loved ones. The nights are very dark in our neighborhoods. By installing an address marker in front of your house, our fire department will be able to provide emergency services at that most critical time.

The address markers are made of Carsonite and are 66" in length. We will include up to 4 numbers on both the front and back (where required). There is a reflective material that is put behind the numbers to allow them to be seen at night.

To cover our cost we are requesting a \$30 donation for the installation of the markers on your property. Any additional money that you can donate will be greatly appreciated and will go to a very worthy cause in our community; spreading the word about the fire danger that exist in our community and what can be done to protect ones property.

Thank You
